

## IN-GROUND "1000 & 1500" PACKAGED PUMP STATIONS

The **Wallace In-ground 1000 litre & 1500 litre** packaged pump stations are designed to provide 24 hour storage for sewage and waste water in below the sewer line applications.

The high strength PE chamber is NZ designed and manufactured and conforms to both

- ✚ AS/NZS 4766 – PE storage tanks for wastewater and chemicals.
- ✚ AS/NZS 1546.1 – on site domestic wastewater treatment facilities.

The geometric shape allows for maximum strength under compression while also offering the advantage of anti-floatation for wet areas.

Tanks come with a 10 year warranty.

### Pumps and Accessories

- ▶ A full range of single and three phase pumps with **heads to 30 metres** – supplied fitted – to suit each installation.
- ▶ Factory fitted high level alarm comes standard.
- ▶ Single 100 mm waste connection with 50 mm discharge fitted.
- ▶ 50 mm isolating valve and non return valve supplied
- ▶ Junction box for electrical connection supplied on the tank.
- ▶ In addition to the high level alarm an SF Monitor can be purchased separately which activates either a single or twin 24 Vdc solenoid valve cutting the water supply to the facility to prevent the chamber from over flowing.

Supplied through all good builders hardware and plumbing merchants
