

# **POLYSLAB™** *PUMP COVERS*

# PROTECT YOUR INVESTMENT!

DISTRIBUTED BY:

### Features:

- Combo includes Polyslab base, designed to raise the pump off the ground.
- Easy to install and pump can be easily secured to the base.
- Water resistant cooling vents allowing hot air to escape and cool air to be drawn in, creating a natural thermal convection.
- Designed to allow water to escape in case of pipe failure.
- Multiple footing points to secure the Pump Cover to the Polyslab Base to keep it locked safely into place.
- Rated to over 120kg.
- Easy to follow cut & snap entry points (allowing for common pipe dimensions).
- Designed in consultation with major pump manufacturers to cater for the majority of the domestic and light industrial applications.
- We use only the highest quality material for all of our products. We also pride ourselves on using recycled materials in all of our products where possible.
